Work experience

Software Developer

Neudesic, India | Oct 2023 - Jan 2026

Worked as a Full Stack Developer with primary focus on React.js development, contributing to projects in the entertainment and transportation management domains for clients like PVR, AMN, and Downer. Involved in designing and developing responsive user interfaces using React, improving user experience and application performance.

Collaborated with backend teams and contributed to .NET (C#) Web API development, including implementing and integrating RESTful services. Worked with SQL Server for data handling, writing queries, and supporting database operations.

Participated in Agile development processes, including sprint planning,

development, testing, and deployment. Also gained exposure to Azure cloud services (basic level) for application deployment and monitoring.

Assignment history

Frontend developer

DOWNER EDI LIMITED, India | Dec 2025 - Present

Project name: Downer SPA

A train schedule management portal for an Australia-based transportation project (Downer), aimed at streamlining and managing train scheduling operations efficiently. The application enables users to view, update, and manage train schedules in real time through an intuitive and user-friendly interface.
